RELY ON AN EXTRA PAIR OF HANDS FROM WEBSERVICES AS NEEDED, TO HELP MEET YOUR CUSTOMER DEADLINES

2020

ABOUT METASITE

Metasite is a company that specializes in bespoke digital financial platforms and application design, engineering, integration, and support for the financial industry and rising fintech organizations, operating its main technology delivery center in the New Nordic fintech hub of Vilnius. Metasite's 100+ strong team has an excellent 22-year track record in delivering custom web applications and backend financial platform development and support services for clients across the U.K., U.S., Switzerland, and a number of other locations in Europe.

Metasite customers include hedge funds and a top-3 stock exchange, as well as banks, insurers, and several financial information services. The team comprises financial system architects, software developers, UI designers, QA engineers and more that offer a comprehensive understanding of the financial services sector as well as quality-assured bespoke software engineering.

Indrė Chomentauskienė, COO at Metasite, describes work at the company: "It is never boring. The projects are intense, require strong domain expertise and often come with very strict deadlines. Sometimes the projects require a quick ramping up of resources due to additional scope with very tight delivery deadlines. It's not always feasible to hire additional people for a temporary scope increase in a single project, you need to find a more rational solution and for us that was getting reliable extra hands from 1ClickFactory, to make sure we have enough resources to deliver the increased project scope within the specified time frame."

ACCESS THE RIGHT SET OF SKILLS WHEN YOU NEED IT MOST WITH 1CLICKFACTORY

1ClickFactory came in handy when a client of Metasite reviewed the scope of an already sizeable project and asked to expand the delivery team considerably at very short notice in order to keep to the tight delivery deadlines with the increased scope. Metasite needed additional resources that had expertise in the right technology and could quickly join the project team with little or no training. Therefore, Metasite requested two 1ClickFactory WebServices team members to help out with this one-off project.

The project proved to be a good experience for 1ClickFactory's WebServices team members as it presented the possibility to work on a challenging .NET/React-based project with an intense timeframe and a state-of-the-art technological stack.

THE 1CLICKFACTORY TEAM IS SO EASY TO WORK WITH – YOU'LL THINK WE'RE PART OF YOUR INTERNAL TEAM!

"After receiving our client's request to immediately increase the project team, we swiftly activated the whole strong network of technology partners. 1ClickFactory, being among the selected Metasite partners, were able to quickly offer specialists with the qualifications and skillset needed," shares Indrė Chomentauskienė. "We were able to expand our team with reliable, responsible, and qualified specialists that helped us to deliver the project successfully and meet the aggressive timelines".

Based on Indrė's feedback, 1ClickFactory's Webservices team not only had the right competencies for the project, but also adapted to the team and company culture very well. Despite being from different companies, the whole project team worked hand in hand to successfully deliver on time.

"It was a pleasure working with 1ClickFactory," says Indrė Chomentauskienė. "The communication was spot-on and the specialists we got were excellent professionals. So, if you need some extra help on your web development projects, I can confidently say, 'give the 1ClickFactory WebServices team a go!'"
